

Putting Wireless to Work in Public Safety

Mobile solutions that work for public safety.

You know your departmental challenges better than anyone: quickly identifying potential suspects, keeping your fellow responders informed, and cutting costs while still keeping in contact, to name but a few.

What you might not know is that mobile solutions can help you meet each of these challenges, and many others. The answer lies in connecting people with information on the spot.

Mobile solutions put information in your teams' hands where and when they need it—and keep that information out of the hands of those who shouldn't have it. The ability to remotely access and share data can have a substantial positive impact on the way your public safety department runs.

Mobile public safety solutions include real-time data access, live video streaming, and radio interoperability solutions.

We look forward to showing you how wireless support can help your teams serve the community more safely and efficiently.

Real-Time Data Access

Spot the bad guys and get them off the street.

Challenge

A bike patrol officer notices a man loitering near a downtown park. He's not doing anything wrong at the moment, but the officer has a gut feeling that the guy is up to something. Plus, he looks vaguely familiar. Has he seen a mug shot of this guy?

Solution

A smartphone on the Verizon Wireless network and police-specific software provide direct, immediate access to local, state, and federal crime databases. The officer enters the man's identifying characteristics to narrow the scope, then scans through mug shots and criminal histories on his smartphone.

Results

It turns out the guy is a known drug dealer with an outstanding warrant for his arrest. The officer calls for backup, and arrests him on the spot. That's one less bad guy on the street. And one more police officer with the right tools to do the job.

Access criminal databases on the spot.

Wireless Video Systems

Let fellow responders know what's happening with live video streaming.

Challenge

Too much rain and too much runoff, and a normally placid river is overflowing its banks. A state trooper is first on the scene, and wants to make sure that other first responders understand the scope of the problem.

Solution

Fortunately, the state trooper's SUV includes a dash-mounted video camera and a notebook with Verizon Wireless Mobile Broadband service. He's able to send streaming live video of the flood to other agencies.

Results

Thanks to the real-time footage, the other agencies can quickly determine the resources needed to evacuate the area and contain the flooding. The police and fire departments send the right number of resources, the area is successfully evacuated, and sandbag crews keep the water from reaching nearby homes.

Interoperability Solutions

Extend your radio reach on a tight budget.

Challenge

Your department is low on funds and your Land Mobile Radio (LMR) system has just about reached maximum capacity. But your teams still need to communicate with dispatch, each other, and other first responders.

Solution

Using a Verizon Wireless Push to Talk interoperability solution, teams using Push to Talk can communicate with LMR systems, including those outside your LMR coverage area.

Results

With Verizon Wireless Push to Talk interoperability solutions and the Verizon Wireless network, agencies can extend the reach and capacity of LMR systems. You gain more for less.

Get Verizon Wireless and get more than wireless coverage.

Get people who understand your organization, a network committed to staying up and running during disasters, exceptional customer support, and discounts that increase as your organization grows.

Get mobile services built for the way you work.

Help your people stay productive in the field.

- **Mobile Email.** Stay connected with secure mobile email, calendaring, and task updates.
- **Mobile Broadband.** Get the speed to download and upload—what and when you need.
- **Business Voice Plans & Features.** Customize your plan, and benefit from cost-saving programs like Friends & Family® for Business, plus unlimited calls with other Verizon Wireless customers.
- **Global Services.** Our voice and data services are always packed and ready to go.

Get mobile solutions to help your organization succeed.

Wireless technology is opening up new possibilities every day. Here you'll see just a few of the ways that mobile solutions can help you save time and money and deliver excellent service. But a powerful voice and data network can help your organization in many other ways as well. Call us and we'll tell you all about them.

All on America's largest and most reliable 3G network.

Mobile solutions require a strong network, so we test ours every day. Our real-life test men and women made over 16 million data tests while traveling over 1 million miles last year alone.

The results show we can set up and complete large data transfer sessions with a greater rate of success than our competitors. So when you log on, you stay logged on, in more places. We're proud of our network. See more at verizonwireless.com/bestnetwork.

Put the network to work for your organization.

Think about your own communication challenges. Then contact us and we'll show you how simple it can be to solve them with mobile solutions on America's largest and most reliable 3G network: Verizon Wireless.
